

Accessibility

Effective: September 15, 2026

Vatra is committed to providing a website that is usable by a broad range of visitors, including people with disabilities.

Our Approach

We aim to design and maintain vatra.vc using accessible structure, readable typography, sufficient contrast, keyboard-friendly navigation, meaningful link text, and alternatives for material visual content.

As the website evolves, our goal is to align material public-facing content with generally recognized accessibility practices, including relevant portions of the Web Content Accessibility Guidelines (WCAG) 2.2 Level AA where reasonably applicable.

Ongoing Improvement

Accessibility is an ongoing process rather than a one-time certification. Content, browsers, assistive technologies, and third-party services change over time. We may periodically review the website and make improvements as issues are identified.

Third-Party Content

Some linked or embedded third-party content may be outside our direct control. We encourage third-party providers to support accessible experiences but cannot guarantee the accessibility of external sites or services.

Requesting Assistance

If you have difficulty accessing information on vatra.vc or need content in an alternative format, please contact us and describe the page, content, or function involved. We will make reasonable efforts to provide the information or an accessible alternative.

Feedback

We welcome practical feedback about accessibility barriers. Please include enough detail for us to understand and reproduce the issue when possible.

Contact

Questions about this document or Vatra may be directed through vatra.vc or the contact channels identified on that website.
